

## **Fairtrade Certified**

## Vietnam

Our Sustainable coffee program first started in Cu Mgar district, Daklak province. Our longest standing
certification (4C's Association) introduced the concept of sustainable farming to the region and has acted as
a spring board for alternative certifications including Fairtrade. The farmers and Dakman first received
Fairtrade certification in 2008.
Our sustainability group in Cu M'gar consists of over 2000 members of which 137 are farmers certified by Fairtrade.
The coffee in this area is renowned to be some of the best in Vietnam grown in rich volcanic soil. Dakman purchases up to 876 metric tonnes of Fairtrade coffee grown here every year, covering an area of 241 hectares.

## 

Training & Workshops

Fairtrade workshops and training days provide information, advice and allow farmers to really make the most of their farm as well as encouraging good relations between farmers.
